Work Programme 2024-2027

DISCLAIMER

This draft has not been adopted or endorsed by the European Commission. Horizon Europe - Work Programme 2024-2027
Food, Bioeconomy, Natural Resources, Agriculture and Environment

Destination - Fair, healthy and environment-friendly food systems from primary production to consumption

This destination will support the EU Commission priority 'Sustaining our quality of life: food security, water and nature'.

R&I will provide new knowledge and innovation in support of the EU Vision for Agriculture and Food, built on the recommendations of the Strategic Dialogue on Agriculture, to ensure the long-term competitiveness and sustainability of our farming, fisheries, aquaculture and food sector within the boundaries of our planet. The implementation of the Green Deal actions will continue to guide R&I in this destination to foster sustainable food systems, addressing potential trade-offs between economic competitiveness and environmental sustainability.

R&I will also support the announced Vision for the Fisheries Sector with a 2040 perspective and the European Ocean Pact, a framework of coherence across all policies linked to the ocean. R&I will also be relevant to the outcomes of the evaluation of the common fisheries policy (CFP) and will support its placement under this Pact, as fisheries and aquaculture are affected by other ocean related policies.

An important driving force of food systems transformation should be the integration of sectors, actors (including citizens and consumers) and policies. This will involve a better understanding of the multiple interactions between the components of current food systems, to foster solutions that maximise co-benefits with respect to the priorities of Food 2030¹²⁴.

The EU Communication on Boosting Biotechnology and Biomanufacturing in the¹²⁵ EU provides an overview of the application of biotechnologies in several sectors including food and feed. R&I activities in this destination will also contribute to achieving the objectives of the Strategy for European Life Sciences, the EU Biotech Act, and the Bioeconomy Strategy.
